

Sophisticated beauty therapy

WE are living in an image conscious society. Women everywhere share one common concern. Beauty dilemmas are an inescapable bond that unites them.

Looking good is a priority. It affects not only how others look at you, but also how you feel about yourself. Looking good is an attribute desired by women of all ages and ethnicities.

As such, CN Beauty is always looking for the most advanced or revolutionary methods that will make women look and feel younger for the longest period of time.

Now the latest advancement in high-tech facial contouring and body sculpting is available at most of CN Beauty's 30-over outlets in Malaysia.

Pollogen's Apollo is a medical Conformité Européenne (CE)-certified "all-in-one" solution for both reducing excess fat and circumference and replenishing collagen to tighten skin, remove lines and reduce the signs of ageing.

This unique solution, powered by the clinically-proven TriPollar technology optimised for the medical practice, is an advanced non-invasive, pain free, fast and effective aesthetic treatment for all areas of the body, including a special small applicator for treating very delicate areas.

Single solution for skin tightening, body sculpting and wrinkle, cellulite and fat reduction

The Apollo system is the ideal solution. The new large body applicator offers a unique design to treat orange peel skin and localised fat deposits in wide body areas – with maximum skin coverage and powerful, high-energy heating capacity for medical practices.

The medium applicator is used for confined areas such as the face, neck and arms. The small applicator is used to treat fine lines in delicate areas.

Full face treatment and delicate areas

With the Apollo system, physicians can treat the most delicate areas of the face such as areas around lips (peri oral), around the eyes (peri orbital), forehead and hands. The small applicator makes it possible to painlessly and safely reduce lines without the risk of damage.

Impressive and instant clinically-proven results. Clinical results of TriPollar treatments show significant circumference reduction in the abdomen, buttocks and thigh areas. These findings are backed by ultrasound fat measurements and histology results demonstrating increased fat metabolism and collagen remodelling.

Proven TriPollar technology for superior results

RF energy has been successfully used in aesthetic medicine due to its well established safety and efficacy profile.

Overcoming the limitations of both mono-polar and bi-polar RF energies, the Apollo system heats the dermal and subcutaneous skin layers concurrently in a multi-electrode configuration painlessly without injuring the epidermis. This augments collagen regeneration and accelerates fat metabolism - for an ideal choice for both skin tightening, wrinkle reduction on even the most delicate areas of the face, as well as reducing excess fat and circumference, body sculpting and improving cellulite appearance.

Fast, easy treatments with no downtime

A gentle alternative to invasive surgery or painful laser treatments, the Apollo system has been clinically proven on all skin types. A typical facial treatment takes only 10 to 15 minutes; body therapies can be completed within half an hour.

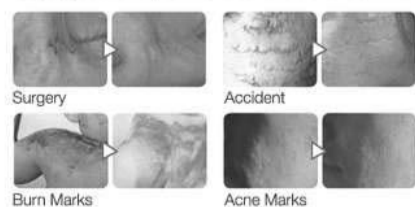

Very attractive offers await the first 20 customers who sign up for package deals. For details, call 1-300-88-8826, e-mail info@cnbeauty.com.my.

The Apollo system offers a unique design to treat orange peel skin and localised fat deposits in wide body areas. It can also be used for confined areas such as the face, neck and arms.

MEDERMA® - THE PERFECT SCAR SOLUTION FOR THE WHOLE FAMILY.

MEDERMA® Skin Care for scars is a non-greasy and easy to use gel that helps in making scars appear softer and smoother. Freedom to enjoy your active lifestyle.

Walking with pain?

Instant relief with the "Rite" fit.

Plantar Fasciitis or Heel-spurs is a common problem that causes intense pain and discomfort for many people. It is caused by the straining of the ligaments that support your foot arch and repeated strain can cause tiny tears in the ligaments, causing more intense pain over time.

HEEL RITE™ is another innovative product from Thermoskin® containing its revolutionary Trioxon® technology that helps provide instant relief by providing support to the ligament and increase blood circulation to promote self healing. It fits snugly into your shoe, so that you can carry on your daily routine.

Adjustable tension strap gently compresses plantar fascia attachment for pain relief and treatment.

Thermoskin HEEL-RITE™ Daytime Relief for Plantar Fasciitis or Heel-spurs

Thermoskin's revolutionary Trioxon® technology harnesses heat from your body to promote blood circulation whilst keeping your skin dry by quickly dissipating perspiration. This encourages your body to heal naturally for a faster recovery.

Distributed by Newage Sdn Bhd
 Available at Guardian, Caring, Vitacare, Alpro and selected independent pharmacies.
